Uniformity		An analysis of assessed values compared to sale prices shows newer properties in the western								
		and northern parts of Oshkosh are selling for more than the assessed value and properties in the								
		central and older parts of Oshkosh are selling for less than the assessed value. The percent difference is								
		over 10% between older homes and newer homes. A couple of examples are homes in the Heidi Haven/								
		Pheasant Creek/Judy Lee Dr/Baily Ct area sell for 2% more than the assessed value and homes in the								
		Murdock/Hazel/New York/Baldwin area sell for 10% less than the assessed value. Performing a market								
		update will restore uniformity between age groups and neighborhoods.
