STATEMENT OF ACTIVITIES

2014 CDBG Program Environmental Status Determination

Activities Identified in 2014 Action Plan	Previously Assessed	Environmental Assessment Required	Categorically Excluded	Exempt	Citation of Relevant Sections of 24 CFR
Targeted Central City Redevelopment			X		58.35 (a) 1
Housing Rehabilitation			X		58.35 (a)(3)(i)
Rental Rehabilitation	X				58.35 (a) 3
Neighborhood Initiatives	X		X		58.35 (a) 1
General Public Services *				X	58.34 (a) 4
Fair Housing Center of NE Wisconsin *				X	58.34 (a) 3
Administration and Salaries *				X	58.34 (a) 3

*Per 24 CFR Part 58, Section 58.34

A recipient does not have to submit an RROF and certification, and no further approval from HUD or the State will be needed by the recipient for the drawdown of funds to carry out exempt activities and projects. However, the responsible entity must document in writing its determination that each activity or project is exempt and meets the conditions specified for such exemption under this section.

This document serves as the City's determination of these exempt activities.

CATEGORICALLY EXCLUDED PROJECTS

ENVIRONMENTAL ASSESSMENT

TARGETED CENTRAL CITY REDEVELOPMENT (MULTI-YEAR)

Brief Description of Project Activity:

Funds from this program will be used to assist with the redevelopment of blighted properties within designated slum and blight areas within the central city or in designated redevelopment districts. Activities may include acquisition, relocation, environmental remediation, public facility improvements, streetscaping and site clearance or improvements.

Funds will also be used for activity in the South Shore Redevelopment Area, along the south side of the Fox River. The South Shore Redevelopment Area has been previously assessed and previous Requests for Release of Funds have been granted by HUD.

As additional specific sites are identified, the Environmental Checklist will be filed for each property.

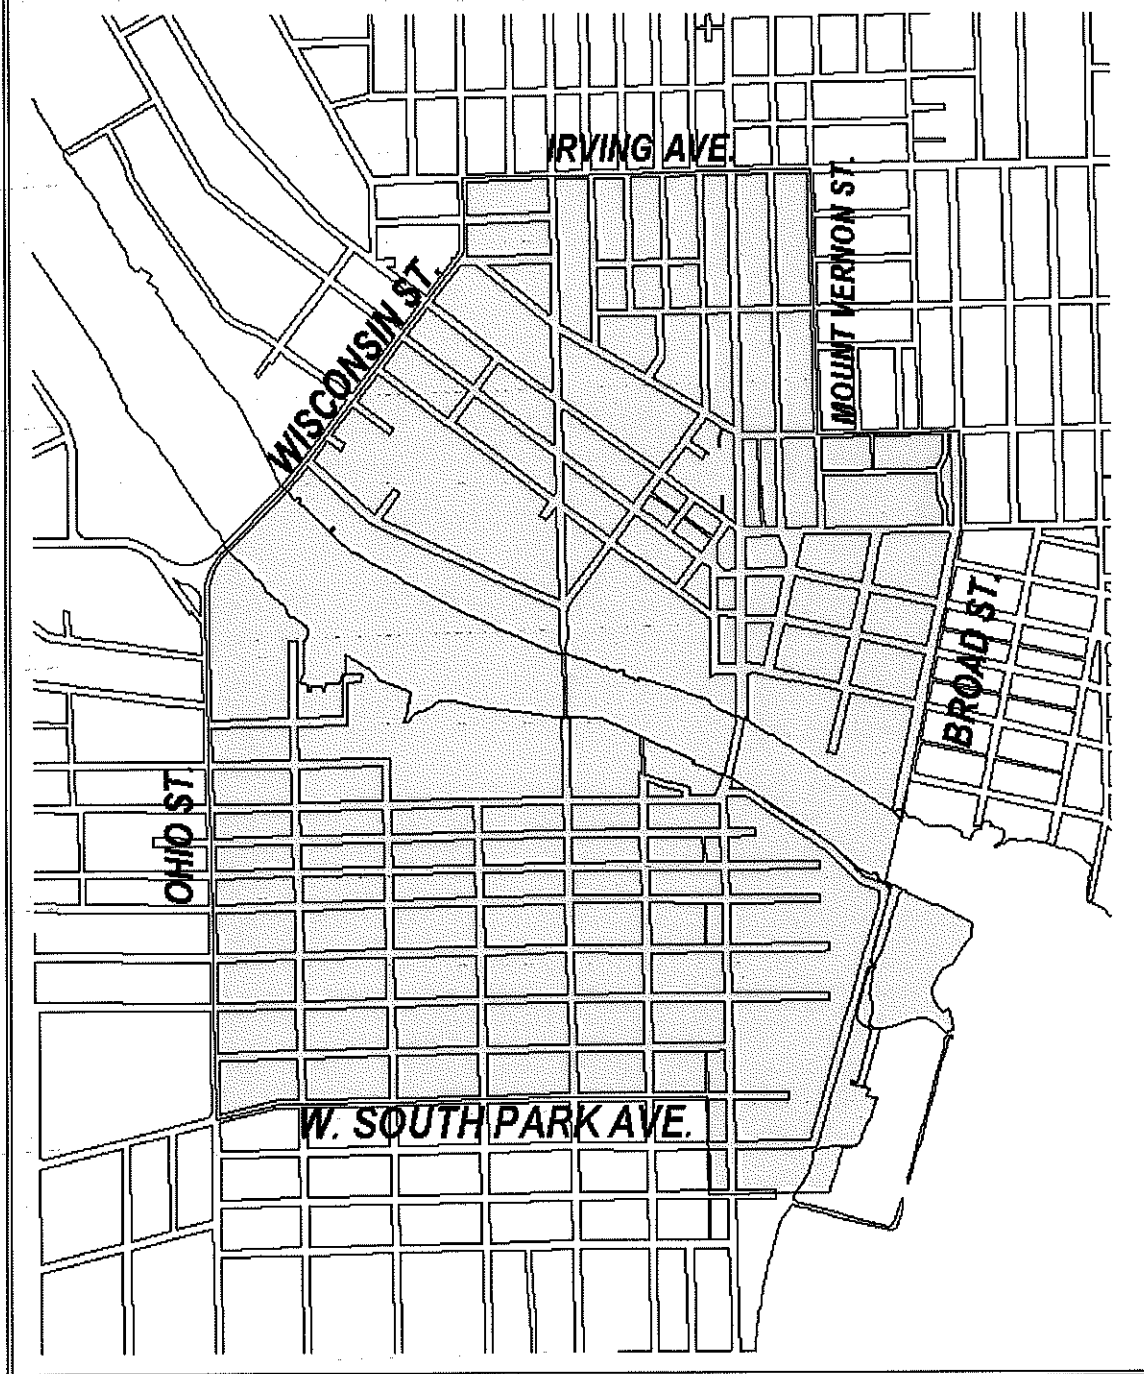

Brief Description of the Project Site and Immediate Area:

Project sites will be located in designated slum and blight area within the Central City and the larger Central City Planning Area. See maps on following pages.

ENVIRONMENTAL ASSESSMENT

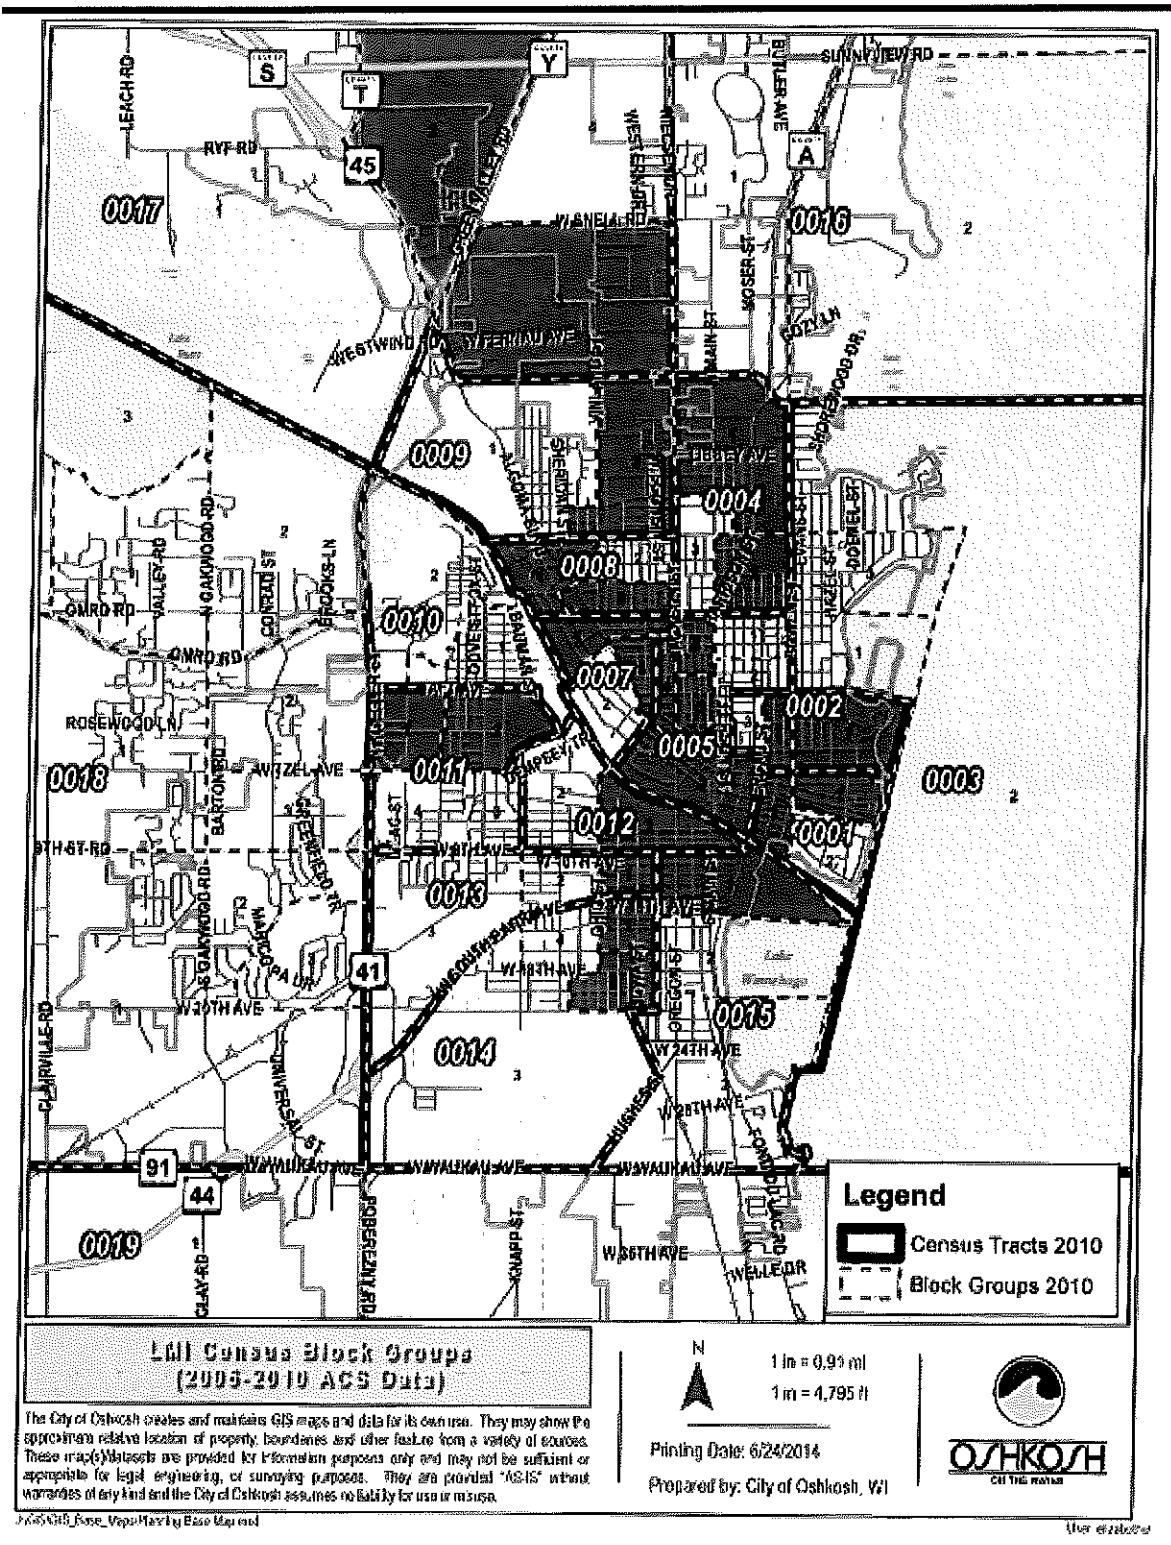

HOUSING REHABILITATION PROGRAM (MULTI-YEAR)

Brief Description of Project Activity:

This is an on-going housing rehabilitation activity that provides deferred payment loans to low and moderate income homeowners who are unable to cover the cost of the needed repairs. Activities may include repairs, upgrades, handicap modifications, etc., to owner-occupied homes, as well as homes acquired through this program for the purposes of neighborhood stabilization, removal of blight, or part of a neighborhood initiatives plan area. This program benefits both the property owners, by improving their living environment, as well as benefiting the neighborhood by eliminating blighting conditions. This project also utilizes program income from the repaid loans. An environmental checklist will be completed for each individual rehabilitation project and be kept on file with the Department of Community Development.

Brief Description of the Project Site and Immediate Area:

The program places emphasis on rehabilitation of homes in low and moderate income census tracts and block groups (see map on following page), but is available city-wide to low and moderate income persons.

ENVIRONMENTAL ASSESSMENT

NEIGHBORHOOD INITIATIVES (MULTI-YEAR)

Brief Description of Project Activity:

CDBG funds will be used for neighborhood-related activities, which may include the establishment of neighborhood associations, streetscaping, neighborhood facilities, parks/recreational facilities, and public facilities and improvements. The City may also use funds for the purchase, demolition, and disposition of deteriorating or blighting structures/properties.

Brief Description of the Project Site and Immediate Area:

In 2005, the City adopted the 2005-2025 Comprehensive Plan based on requirements through the State of Wisconsin's Comprehensive Planning legislation. "Neighborhood Improvement Strategic Areas" with three levels of priority were identified within the Comprehensive Plan document based on neighborhood characteristics. To establish the "priority areas," data from the U.S. Census (tract and block group level) were analyzed, including the value and age of the housing stock, the tenure of residents (owner versus renter), and the LMI areas. This data serves as the basis for assigning the priority given to each area. While three different priority levels are identified, in 2012 funds will continue to be concentrated within Priority 1 and 2 Areas, the Near East Neighborhood and the Broad/Bay Neighborhood priority areas (see maps on previous pages).

Characteristics of the Priority 1 and 2 Areas are as follows:

Priority 1 Areas are the four darkest areas shown on the following map. These areas tend to have poor streets, or streets without curb and gutter, and have the greatest need for neighborhood revitalization and housing rehabilitation. All Priority 1 Areas are in LMI census tracts or block groups. Other characteristics include:

- Owner-occupied rates lower than the city as a whole.
- Percentage of homes built pre-1940 is higher than the overall percentage.
- The median year structures were built in these areas range from pre-1940 to 1955, compared to the city's median year of 1959.
- The median value for owner-occupied units ranges from 4 to 28 percent lower than the city's overall median value of \$117,100.

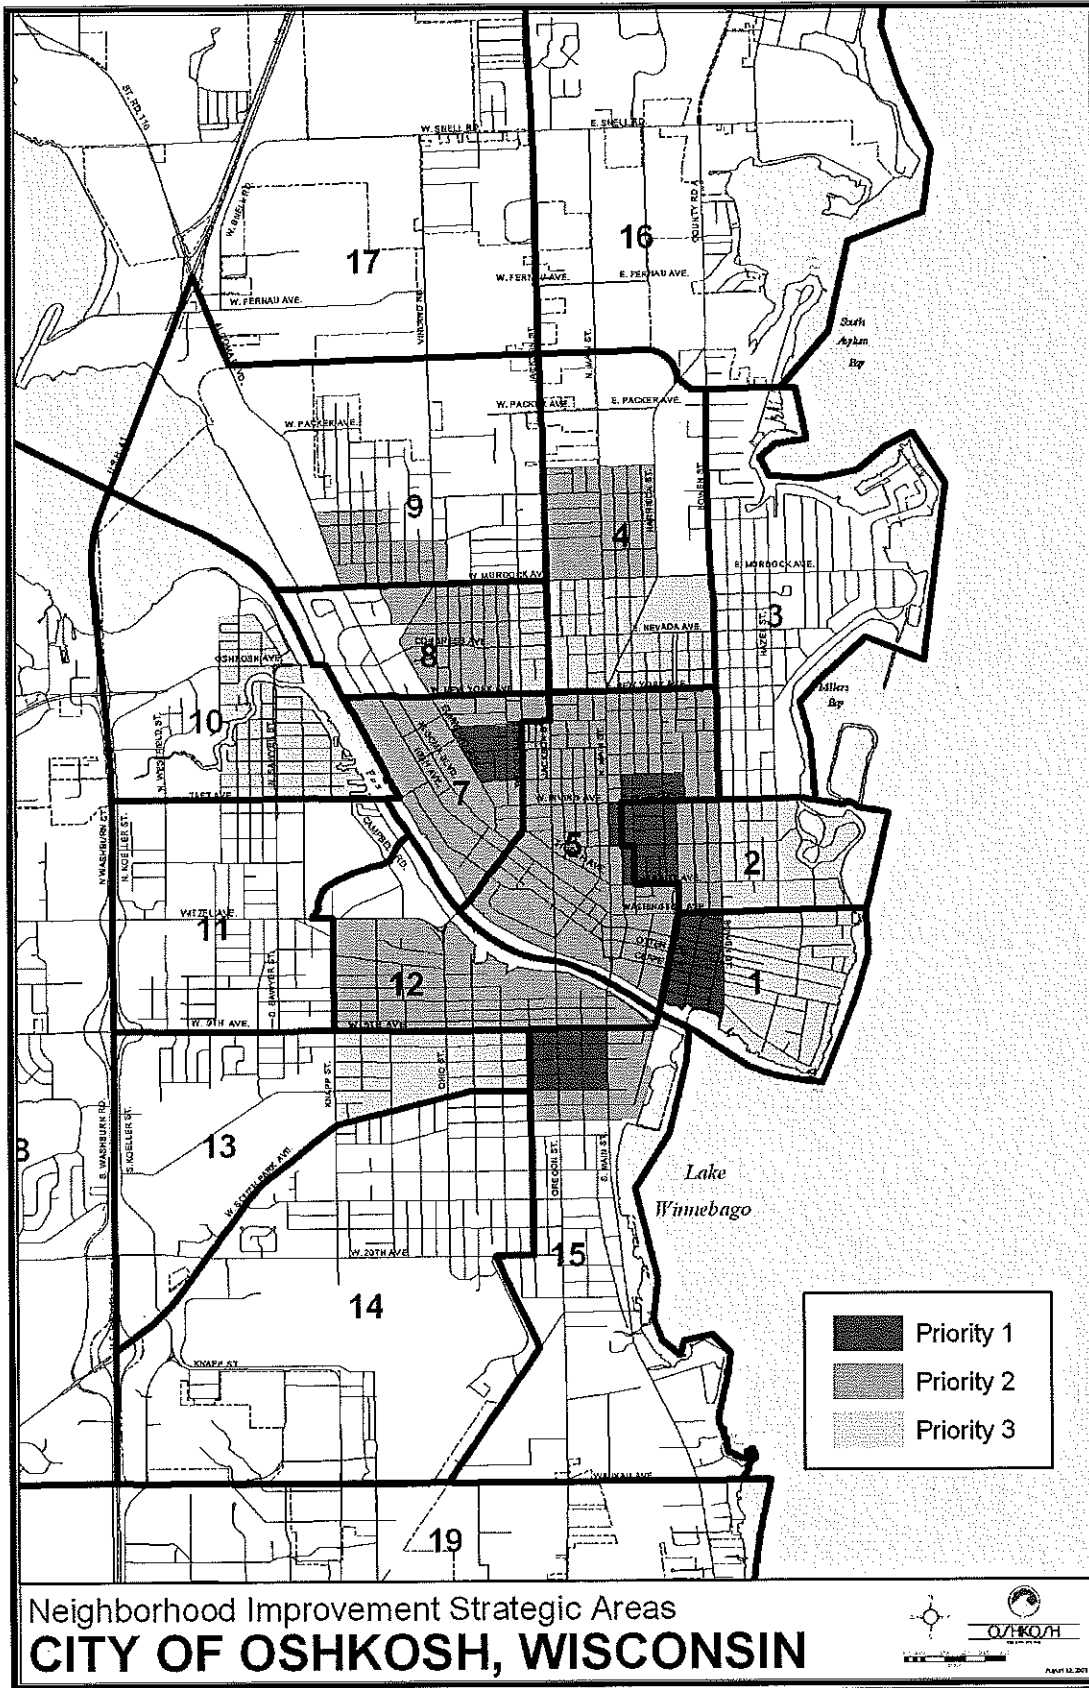

The **Near East Neighborhood (NEN)** was selected as the first neighborhood where concentrated efforts took place in the 2005-2009 Consolidated Plan timeframe and continue to take place throughout this 2010-2014 Consolidated Plan period. This neighborhood is bordered on the west by Jefferson Street, on the north by Lincoln Avenue, on the south by Merritt Avenue and on the east by the Canadian National

Railroad. Activities undertaken in the NEN have and will meet the national objectives of benefiting LMI persons and preventing/eliminating slums or blight. The NEN is entirely within either a LMI Census Tract or Block Group; therefore, the percentage of LMI persons is at least 51% of the residents within the neighborhood. This neighborhood consists of Census Tract 2, Block Group 3, and a portion of Block Group 2 and 3 of Census Tract 5. Activities for residents of this area may be conducted with a LMI Area Benefit because these activities are available to benefit all residents of the service area. Services for specific residents of the service area (seniors, tenants, children, etc.) may also qualify under the Limited Clientele subcategories of the LMI Area Benefit national objective.

The **Broad/Bay Area Neighborhood** is anticipated to be initiated as the second focused neighborhood improvement area. This neighborhood improvement area is bordered on the west by Broad Street, on the north by Merritt Avenue, on the south by Bay Shore Drive and on the east by the Bowen Street. The City of Oshkosh Department of Community Development sees this as an appropriate selection due to the age and condition of the housing stock, the low rate of owner occupancy (57.68% per the 2010 Census), and the fact the area is a LMI block group.

The City will supply CDBG rehabilitation funding, Neighborhood Initiative funds, technical assistance, and will consider adoption of supportive zoning regulations for the creation of a true private-public partnership. The Broad/Bay Area is Block Group 3 of Census Tract 1, and is a LMI block group. The neighborhood is primarily residential in use and the boundaries in the map delineate the area that will be served by these concentrated neighborhood activities. Therefore, activities for residents of this area may be conducted with a LMI Area Benefit because these activities are available to benefit all residents of this defined service area. Services for specific residents of the service area (seniors, tenants, children, etc.) may qualify under the Limited Clientele subcategories of the LMI Area Benefit national objective.

The **North Campus Neighborhood and the Near Southside Neighborhoods** are also Priority 1 Neighborhood Improvement Areas. These areas are not expected to become "active" during the 2010-2014 Consolidated Plan Period; however, special consideration on spending, especially with slum and blight removal and rehabilitation projects, will be given in these areas (see maps on previous pages).

The National Wetlands Inventory

The National Wetlands Inventory (NWI) has been producing wetland maps and geospatial wetland data for the United States since the mid-1970s. The focus has been on two fronts: 1) map or digital database preparation and delivery to the public, and 2) projecting and reporting on national wetland trends using a probability-based sampling design. The status of mapping has been made available through various media throughout NWI's 30-year history (e.g., state atlases, regional status maps, and now through the internet via the Wetlands Mapper online tool).

Regional Wetlands Coordinators are located in each of the Service's regions. The National Standards and Support Team is located in Madison, WI, and is the home of the Wetlands Geodatabase as well as staff providing science and support for all geospatial applications of wetlands data. The Wetlands Mapper serves as the data discovery mechanism and is managed in cooperation with the U.S. Geological Survey in Madison, WI.

The U.S. Fish and Wildlife Service (Service) is the principal Federal agency that provides information to the public on the extent and status of the Nation's wetlands. The agency has developed a series of topical maps to show wetlands and deepwater habitats. This geospatial information is used by Federal, State, and local agencies, academic institutions, and private industry for management, research, policy development, education and planning activities. Digital data can be viewed and downloads are available through the Wetlands Mapper.

The Fish and Wildlife Service is headquartered in Arlington, Virginia, and responsibility for the geospatial wetlands data falls to the Division of Budget and Technical Support.

NWI Overview

The National Wetlands Inventory (NWI) was established by the US Fish and Wildlife Service (Service) in 1974 to conduct a nationwide inventory of U.S. wetlands to provide its biologists and others with information on the distribution of wetlands to aid in wetland conservation efforts.

Susan Kepplinger
Principal Planner
City of Oshkosh
P.O. Box 1130
Oshkosh, WI 54902-1130

Dear Ms. Kepplinger:

The Winnebago County Solid Waste Management Board owns and operates a comprehensive integrated solid waste management system that provides services to Winnebago County communities, business and industries.

In 2002 Winnebago County joined forces with Brown and Outagamie Counties forming the Tri-County Solid Waste and Recycling Intergovernmental Agreement. This agreement provides landfill and recycling capacity to the City of Oshkosh and 73 other municipalities until the year 2027.

The Tri-County Agreement has established a twenty-five (25) year partnership between the City of Oshkosh and Winnebago County to manage solid waste and recyclables in a cost efficient manner.

Sincerely,

A handwritten signature in cursive script that reads "Lisa Mordan".

re: CDBG Action Plan
 City of Oshkosh
 Winnebago County, Wisconsin

Dear Mr. Buck:

The U.S. Fish and Wildlife Service (Service) has received your letter dated May 29, 2007, requesting comments on the proposed plan. We have reviewed the information provided with your letter and our comments follow.

Federally-Listed Threatened and Endangered Species and Critical Habitat

Currently, our records indicate that there are no federally-listed threatened or endangered species or critical habitat known to be present within the described project area. However, our records are not comprehensive. Please be aware that over time, habitats near the project site may be utilized by listed or proposed species not present at this time. It is also possible that critical habitat could be proposed or designated for a species. Therefore, if there is a time lag of more than 12 months between plan completion and execution, it is important to reassess the impact of the project on federally-listed or proposed species or designated critical habitat prior to start of construction activities.

As this project involves a Federal action (i.e., funding), the U.S. Department of Housing and Urban Development (HUD), or its designated agent, is responsible for making a determination under Section 7 of the Endangered Species Act of 1973, as amended (ESA), as to whether the selected project alternative may affect federally-listed threatened or endangered species or designated critical habitat. If the proposed project may affect, but is unlikely to adversely affect federally-listed threatened or endangered species or designated critical habitat, HUD must obtain written concurrence from our office. If the project may affect, and is likely to adversely affect federally-listed species or adversely modify designated critical habitat, HUD must initiate formal consultation with the Service in accordance with section 7 of the ESA. Further information on

the section 7 consultation process can be obtained by contacting the staff person identified at the end of this letter.

We appreciate the opportunity to respond. Questions pertaining to these comments can be directed to Ms. Leakhena Au at 920-866-1734.

Sincerely,

A handwritten signature in cursive script that reads "Louise Clemency". The signature is written in black ink and is positioned above the typed name and title.

Louise Clemency
Field Supervisor

Wisconsin Endangered and Threatened Species Laws & List

PUBL-ER-001 2004
REV January 2014

Definitions

Wisconsin Endangered Species: Any species whose continued existence as a viable component of this state's wild animals or wild plants is determined by the Department to be in jeopardy on the basis of scientific evidence.

Wisconsin Threatened Species: Any species which appears likely, within the foreseeable future, on the basis of scientific evidence to become endangered.

State Laws

Endangered and Threatened Species Laws (State Statute 29.604 & Administrative Rule NR27)

Animals - It is illegal to take, transport, possess, process or sell any wild animal that is included on the Wisconsin Endangered and Threatened Species List without a valid permit.

Plants - No one may process or sell any wild plant that is a listed species without a valid permit. On public lands or lands you do not own, lease, or have the permission of the landowner, you may not cut, root up, sever, injure, destroy, remove, transport or carry away a listed plant without a permit. There is an exemption on public lands for forestry, agriculture and utility activity.

Permits - No one is exempt from these laws, but an Endangered or Threatened Species "Scientific" Permit or an Incidental Take Permit can allow you to conduct certain activities under specified conditions. The Department of Natural Resources may issue these permits, under specified terms and conditions to take, transport, possess, or export listed endangered or threatened species. Permit information and applications are available from the Bureau of Natural Heritage Conservation (address below).

Violations

Endangered and Threatened Animals: If the state law is violated unintentionally, the violator is subject to a fine of no less than \$500 and no more than \$2,000 and the court shall revoke all hunting privileges for one year. If the law is violated intentionally a person may be fined no less than \$2,000 and no more than \$5,000 or may be imprisoned for 9 months, or both. The court shall revoke all hunting privileges for three years. Violations of Federal Laws will result in additional penalties.

Endangered and Threatened Plants: If the state law is violated unintentionally, the person is subject to a fine of \$1,000 or less. If the law is violated intentionally, the person is subject to a fine of \$1,000 or less and/or 9 months imprisonment.

Report violations of wildlife laws to the toll-free Wisconsin Emergency Hotline: (1-800-847-9367).

** also Federally Endangered

* also Federally Threatened

A Reminder

The Department of Natural Resources reminds you that the Endangered and Threatened Species list is only a first step toward identifying a problem that exists. It doesn't tell what the problem is or what to do about it. Moreover, it does not guarantee survival of the plants and animals listed. The real work follows listing. The Bureau of Natural Heritage Conservation formulates management plans to aid the recovery of listed species. DNR resource managers put the plans to work in the field, while conservation wardens enforce laws protecting endangered resources.

A Request

The Bureau of Natural Heritage Conservation welcomes observations of endangered and threatened plants and animals. We are also interested in observations of species of special concern (species about which some problem of abundance or distribution is suspected but not yet proven). If you would like to obtain reporting forms for submitting observations and/or a list of special concern species, please contact us at the address or phone number in the box at right.

Henslow's Sparrow

Help Us Protect Wisconsin's Natural Diversity!

The Wisconsin Natural Heritage Conservation Program is funded primarily by contributions to the tax checkoff on the Wisconsin state income tax form, the purchase of Endangered Resources License Plates, or through donations sent directly to the Bureau of Endangered Resources. Your support is vital. Help us continue recovery efforts for endangered species, preservation of rare plants and animal communities and educational efforts to protect our rich natural heritage. Remember to designate a gift on your tax form, order a license plate or send a contribution to the address below.

For further information, contact:

Wisconsin Department of Natural
Resources
Natural Heritage Conservation Program
P.O. Box 7921
Madison, WI 53707-7921
Telephone: (608) 267-2108
FAX: (608) 266-2925

If you would like an application form for an
Endangered Resources license plate, send a request to
the above address or to:

Wisconsin Department of Transportation
Special Plates Unit
P.O. Box 7911
Madison, WI 53707-7911

This publication has been made possible by
contributions to the Endangered Resources Fund and
the purchase of Endangered Resources License
Plates.

Counties Designated "Nonattainment"

for Clean Air Act's National Ambient Air Quality Standards (NAAQS) *

Guam - Piti and Tanguisson Counties are designated nonattainment for the SO₂ NAAQS

* The National Ambient Air Quality Standards (NAAQS) are health standards for Carbon Monoxide, Lead (1978 and 2008), Nitrogen Dioxide, 8-hour Ozone (1997 and 2008), Particulate Matter (PM-10 and PM-2.5 (1997 and 2006)), and Sulfur Dioxide.(1971 and 2010)

** Included in the counts are counties designated for NAAQS and revised NAAQS pollutants. 1-hour Ozone is excluded. Partial counties, those with part of the county designated nonattainment and part attainment, are shown as full counties on the map.

Farmland Protection Policy Act

Latest Feature

To know more about the Farmland Protection Policy Act, you can play the webinar below or download the webinar's PowerPoint file.

[Webinar - Farmland Protection Policy Act \(9/2/...\)](#)

Background

The National Agricultural Land Study of 1960-61 found that millions of acres of farmland were being converted to non-farm uses. The study identified the need for a national program to protect farmland and combat urban sprawl and the waste of energy and resources that accompanies sprawling development.

The Comptroller report indicated that much of the sprawl was the result of programs funded by the Federal Government. With this in mind, Congress passed the Agriculture and Food Act of 1961 (Public Law 97-99) containing the Farmland Protection Policy Act (FPPA) subtitle I of Title XV, Section 1339-1549. The final rules and regulations were published in the Federal Register on June 17, 1964.

Purpose

The FPPA is intended to minimize the impact Federal programs have on the unnecessary and irreversible conversion of farmland to nonagricultural uses. Federal programs administered by state, local units of government, and private agencies are required to develop and review their policies and procedures to implement the FPPA every two years.

The FPPA does not authorize the Federal Government to regulate the use of private or nonfederal land or, in any way, affect the property rights of owners.

For the purposes of FPPA, farmland includes prime farmland, unique farmland, and land of statewide or local importance. Farmland subject to FPPA requirements does not have to be currently used for cropland. It can be forest land, pastureland, cropland, or other land, but not water or urban built-up land.

Projects and Activities

Projects are subject to FPPA requirements if they may irreversibly convert farmland (directly or indirectly) to nonagricultural use and are completed by a Federal agency or with assistance from a Federal agency.

Assistance from a Federal agency includes:

- Acquiring or disposing of land,
- Providing financing or loans,
- Managing property,
- Providing technical assistance

Activities that may be subject to FPPA include:

- State highway construction projects, (through the Federal Highway Administration)
- Airport expansions
- Electric cooperative construction projects
- Railroad construction projects
- Telephone company construction projects
- Reservoir and hydroelectric projects
- Federal agency projects that convert farmland
- Other projects completed with Federal assistance.

Activities not subject to FPPA include:

- Federal permitting and licensing
- Projects planned and completed without the assistance of a Federal agency
- Projects on land already in urban development or used for water storage
- Construction within an existing right-of-way purchased on or before August 4, 1964
- Construction for national defense purposes
- Construction of non-farm structures needed for farm operations
- Surface mining, where restoration to agricultural use is planned
- Construction of new minor secondary structures such as a garage or storage shed.

Farmland Conversion Impact Rating Form

If you represent a Federal agency in a project that has the potential to convert important farmland to non-farm use, please contact your local office of the Natural Resources Conservation Service (NRCS) or USDA Service Center. NRCS uses a land evaluation and site assessment (LESA) system to establish a farmland conversion impact rating score on proposed sites of Federally funded and assisted projects. This score is used as an indicator for the project sponsor to consider alternative sites if the potential adverse impacts on the farmland exceed the recommended allowable level.

The assessment is completed on form AD-1006, Farmland Conversion Impact Rating. The sponsoring agency completes the site assessment portion of the AD-1006, which assesses non-soil related criteria such as the potential for impact on the local agricultural economy if the land is converted to non-farm use and compatibility with existing agricultural use.

Soil Survey Information and Products:

Web Soil Survey
 The Web Soil Survey (WSS) is an interactive website where current soil survey information can be viewed, explored and printed without having to download the database to your computer. Use the WSS to access soil information on areas less than or equal to 10,000 acres.

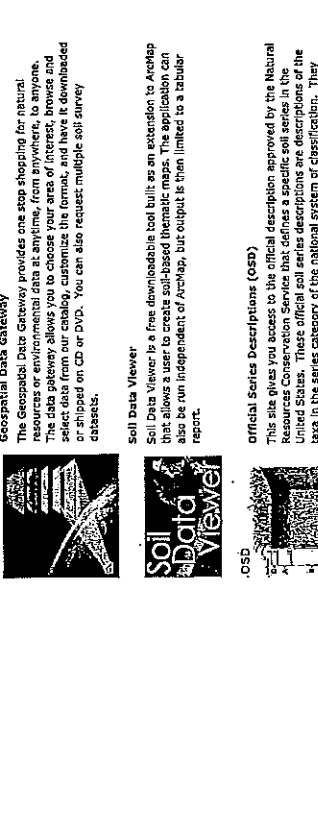

Geospatial Data Gateway
 The Geospatial Data Gateway provides one stop shopping for natural resources or environmental data at anytime, from anywhere, to anyone. The data gateway allows you to choose your area of interest, browse and select data from our catalog, customize the format, and have it downloaded or shipped on CD or DVD. You can also request multiple soil survey datasets.

Soil Data Viewer
 Soil Data Viewer is a free downloadable tool built as an extension to ArcMap that allows a user to create soil-based thematic maps. The application can also be run independent of ArcMap, but output is then limited to a tabular report.

Official Series Descriptions (OSD)
 This site gives you access to the official description approved by the Natural Resources Conservation Service that defines a specific soil series in the United States. These official soil series descriptions are descriptions of the taxa in the series category of the National System of Classification. They mainly serve as specifications for identifying and classifying soils.

NRCS National Soils Program Information
 The National Soils Program provides quality soil survey information necessary for understanding, managing, conserving, and sustaining the nation's limited soil resources.

Environmental Justice

Oshkosh has several sites that report to the EPA
Hazardous waste, Air emissions, water discharge etc.

The screenshot displays the EPA EJView web application interface. At the top, the browser address bar shows the URL: <http://www.epa.gov/ejview/>. The page title is "EJView". The main content area features a map of Oshkosh, Wisconsin, with various environmental data layers overlaid. The legend on the right side of the map lists the following layers:

- Select Map Contents
- Community-based EPA Grants
- EJ Grants
- CARE Grants
- Brownfields Grants
- Sites reporting to EPA
 - Hazardous waste (RQIAInfo)
 - Air emissions (AFS)
 - Water discharges (PCS/ICIS)
 - Toxic releases (TRI)
 - Superfund (CERCLIS)
 - Brownfields (ACRS)
- Water Monitoring Stations
- Places (QGIS)
- Nonattainment Areas
- Health
 - Demographics (SF1) 2010
 - Demographics (ACS) 2010
 - Demographics 2000
- Boundaries and Water Features
- USA Topo Map

The map shows a grid of streets in Oshkosh, WI, with several points of interest marked. The legend is located on the right side of the map, and the map itself is centered on Oshkosh, WI. The interface includes a search bar, navigation tools, and a legend on the right side.

**NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND
NOTICE OF INTENT TO REQUEST RELEASE OF FUNDS
2014 CDBG PROGRAM**

City of Oshkosh
215 Church Avenue
Oshkosh, WI 54903-1130
PH: 920.236.5055

This notice shall satisfy two separate but related procedural requirements for activities to be undertaken by the City of Oshkosh.

On or about August 25, 2014, the City of Oshkosh will submit a request to the U.S. Department of Housing and Urban Development for the release of federal funds under Title I of the Housing and Community Development Act of 1974, as amended, to undertake projects as follows:

- I. **PROJECT: Central City & Public Facilities (multi-year)**
PURPOSE: Funds will be used to assist with the redevelopment of blighted properties within designated slum and blight areas within the central city or in designated redevelopment districts. Activities may include acquisition, relocation, demolition, environmental remediation, public facility improvements, streetscaping and site clearance or improvements.
LOCATION: Central City, redevelopment areas and other blighted properties
ESTIMATED COST: \$100,000

- II. **PROJECT: Housing & Neighborhood Development (multi-year)**
PURPOSE: Funds will be used for repairs, upgrades, handicap modifications, etc. on owner-occupied homes or renter-occupied units of low to moderate income families. Funds will also be used for neighborhood-related activities, which may include streetscaping, tree planting, cleanup, relocation, disposition, clearance, etc. in low/moderate income areas.
LOCATION: City-wide
ESTIMATED COST: \$440,085

The City of Oshkosh has determined that the projects will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Additional project information is contained in the Environmental Assessment on file at the above address and is available for review and may be examined at the Department of Community Development, Room 201, City Hall, between the hours of 8 AM – 4:30 PM, Monday through Friday.

Any individual, group, or agency disagreeing with this determination or wishing to comment on the project may submit written comments to the City of Oshkosh, Department of Community Development, 215 Church Avenue, Oshkosh, Wisconsin, 54901. All comments received by August 25, 2013 will be considered by the City of Oshkosh prior to authorizing submission of a request for release of funds. Comments should specify which Notice they are addressing.

The City of Oshkosh certifies to HUD that Mark Rohloff, in his official capacity as City Manager, consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. HUD's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities, and allows the City of Oshkosh to use Program funds.

HUD will accept objections to its release of funds and the City of Oshkosh's certification for a period of fifteen days following the anticipated submission date or its actual receipt of the request (whichever is later) only if they are on one of the following basis: (a) the certification was not executed by the Certifying Officer of the City of Oshkosh; (b) the City of Oshkosh has omitted a step or failed to make a decision or finding required by HUD regulations at 24 CFR Part 25; (c) the grant recipient has committed funds or incurred costs not authorized by 24 CFR Part 58 before approval of a release of funds by HUD; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a written finding that the project is unsatisfactory from the standpoint of environmental quality. Objections must be prepared and submitted in accordance with the required procedures (24 CFR Part 58) and shall be addressed to HUD, Milwaukee Area Office, 310 W. Wisconsin Ave., Suite W950, Milwaukee, WI 53203. Potential objectors should contact HUD to verify the actual last day of the objection period.

Mark Rohloff, City Manager
