

Menominee Park Shoreland Restoration, Phase 2
April 28, 2012

Time: 8am - 2pm (depending upon # of volunteers)

Note: Partial shifts are welcome, but try hard to be there right away in the morning if at all possible.

Location: Menominee Park Oshkosh, area by the Ames Point peninsula base (park at Oak Trail).

What we're doing: We will be doing a large section of land just south of where Phase 1 is, with the size being about 2 times as large as the first phase. We will be planting many young native perennials throughout the area as well as directly along the water line. We will also be doing similar work as was done with phase one, including site prep, spreading seed, and covering.

Tools: City parks will be bringing more rakes this time, so we'll be set there. If you have a hand shovel for planting small plugs, bring it. Also, dress warm in layers.

What we need: We're looking for at least 40 volunteers. So, if you're coming, bring 3 friends!! Kids welcome - it is a park.

Any questions, contact justin_mitchell1@yahoo.com or Bill Sturm, City Forester bsturm@ci.oshkosh.wi.us
